

INTEGRATED POLICY

GORTER Fémipari Zrt. is the member of Hungarian Association of Aluminium Surface Treatment Companies and ESTAL (Association for European Surface Treatment of Aluminium). Among others the main strategic aim of the company dealing with the surface treatment of products made of aluminium and steel sheet and of pressed aluminium profiles is to reach the business excellence and its continuous improvement.

To realize this aim the management of GORTER Fémipari Zrt. decided to introduce and continuously to improve the Integrated Company Management system which shall include the Quality and Environmental Management Systems based on MSZ EN ISO 9001:2009; and MSZ EN ISO 14001:2005 standards.

The aim of GORTER Fémipari Zrt is the continuous improvement of competitiveness which requires the rational management of the resources, the quick responding to the environment and to the market, the constant improvement of the adaptability.

During the designing and manufacturing process of the products GORTER Fémipari Zrt. via the applied process and job directions corresponds to:

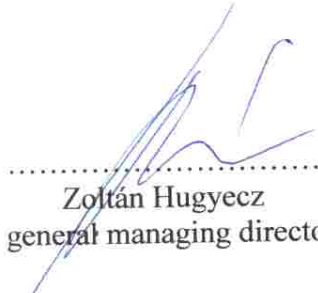

- professional, technological and special requirements of the customers, users, partners;
- general and local environment control laws and rules;
- requirements of labour safety and health.

To attain its goals the company operates an Environmental Management System which recognizes and evaluates the potential safety hazards and applies proper solutions to eliminate or diminish them; which guarantees the minimum environment damage and prevents the health injury or hazard of the employees. The means for the achievement are the applied technology, the professional knowledge of the managers and employees, the continuous monitoring and the permanent training.

The management of GORTER Fémipari Zrt. is completely committed to the achievement of quality and environmental aims and does its best to properly motivate the employees and suppliers in reaching the appointed goals.

The top management Gorter Fémipari Zrt. shall continuously operate the Integrated Management System, shall permanently monitor its operation and efficiency and shall continuously improve the system.

Kerekegyháza, 25 August 2009
